North Carolina Treatment Outcomes and Program Performance System

**Adult Mental Health Consumers:
Johnston LME**

Initial Interviews

July 1, 2007 through June 30, 2008

This report includes consumers receiving only mental health services, and those receiving both mental health and substance abuse services.

Data Collected By:

Center for Urban Affairs and Community Services (CUACS)
NC State University

Report Produced By:

Institute for Community-Based Research
National Development & Research Institutes, Inc. (NDRI)

Prepared For:

Quality Management Team
Community Policy Management Section
DMH/DD/SAS
NC DHHS

July 2008

Introduction

This type of report is available to Local Management Entities, providers and the NC Division of Mental Health, Developmental Disabilities and Substance Abuse Services on data gathered for mental health consumers through the North Carolina Treatment Outcomes and Program Performance System (NC-TOPPS). It provides information gathered through the online NC-TOPPS Initial Interview and includes six pages of charts, tables and text information on mental health consumers' demographic characteristics, symptoms, behaviors and activities, service needs, supports and barriers, family and housing issues and outcome measures collected through an interview with the consumer at the beginning of their treatment. It should be noted that not every data element or response category on the NC-TOPPS Initial Interview is displayed in this report.

Please note that the charts and tables may not always match online queries that you may conduct. The data used in these reports will not necessarily reflect the same points in time. In addition, NDRI who produces these reports cleans the data and removes apparent duplicates prior to preparing the tables and charts.

Additional information about NC-TOPPS and printable version of the interviews are available at <http://www.ncdhhs.gov/mhddsas/nc-topp>

General Information on Interpreting Tables

Types of Statistics	<ul style="list-style-type: none">▶ A <u>count</u> shows the actual number (often designated by the letter “n”) of clients.▶ A <u>percentage</u> is the number of clients with a characteristic or behavior divided by all the clients in the group of interest multiplied by 100. Percentages will be designated with a % sign next to the number.▶ An <u>average</u> is the sum of a set of numbers divided by the number of numbers in the set. When a number in a cell is an average, the word average will appear in the row descriptor.▶ A <u>median</u> is the middle number in a set of numbers, arranged from lowest to highest. For example, the median for the following numbers: 9, 12, 12, 15, 17, 20, 22, 23, 25, 28, 31, 35, 62 is the bolded number, 22. Medians are important measures of central tendency, especially when a mean may be skewed by a very high or very low value. When a number in a cell is a median, the word median will appear in the row descriptor.
Missing Data	For many of the NC-TOPPS forms received, a particular item or question may have been left blank. In calculating the means, medians, and percentages in cells of questionnaire items, this missing data is excluded from the calculation. For example, program X may have submitted 50 assessments but in 2 of the assessments, gender was left blank. When the percent of males is calculated, the 25 males are shown as 52% (25/48*100).
Denominator	The denominator for nearly all percentages is the number of cases shown on the bottom left of the page minus item missing data. All exceptions to this general rule are specifically noted with appropriate text in the graphic or table. This text will state which group is included or excluded from the denominator, such as "of those in the labor force" or "of those with children."
Multiple Response	“Multiple response” indicates a “mark all that apply” type question in which more than one response to a question is allowed. The total of responses may add to greater than 100%. Examples are health insurance or target population. This is in contrast to items such as gender where only a single response is allowed.
Definitions of terms	The appendix at the end of the report gives definitions of acronyms, abbreviations, and other terms used in this report.
Special notes:	

Initial Assessments Received July 1, 2007 through June 30, 2008
Adult Mental Health Consumers
Johnston

This table shows the number of consumers in this report by provider.

Provider	City	ProviderID	Number
Advanced Health Resources	Smithfield	1640	10
Community Based Learning Alternatives Center	Smithfield	1661	14
Coordinated Health Services	Smithfield	1672	3
Coordinated Health Services	Wilson	2508	1
Day By Day Treatment Center	Selma	1098	43
Johnston County Mental Health	Smithfield	27	856
Mental Health Association in NC ACTT	Wilson	2829	8
Nova Behavioral Healthcare	Goldsboro	2417	1
Total			936

1-1: Gender

1-2: Hispanic Origin

Of the Johnston consumers, 5% indicate that they are of Hispanic, Latino, or Spanish origin.

1-3: Race/Ethnicity

1-5: Age Group

1-6: Gender and Age

1-7: Gender and Race/Ethnicity

1-4: Legal Guardian and Designated Payee

Has designated payee	4%
Has legal guardian	2%

2-1: IPRS Target Populations

2-3: Special Programs

2-2: Special Populations

2-4: Health Insurance

Note : Refer to appendix for acronym definitions for all charts on this page.

Number of Initial Interviews: Johnston = 936

3-1: Severity of Mental Health Symptoms, Past Month

3-2: General Assessment of Functioning (GAF)

Among Johnston consumers, the average GAF score was 41.5 and the median score was 42.

3-3: Consumer Ratings on Quality of Life

3-4: Experienced Violence

	%
Physical violence, past 3 months	5%
Sexual violence, ever	15%
Sexual violence, past 3 months	0%
